

Senior Electrical Engineer

Job Description

CNG Engineering, PLLC, is a Mechanical, Electrical, Plumbing (MEP) design consulting firm that excels in providing high-quality engineering services to a wide variety of clients in the building construction industry. This small firm provides an excellent opportunity for the right individual to grow professionally and to realize career goals.

The EE will report directly to the President and/or Office Manager.

Duties/Responsibilities:

- Design of branch circuit distribution systems for power and lighting in commercial facilities
- Design of overall power distribution system
- Design of fire alarm system
- Perform calculations to support system designs
- Attend design and/or construction meetings as required
- Perform construction site visits as required
- Work required hours to complete task and meet company deadlines
- Develop meeting minutes and/or site observation reports
- Provide overall direction for design team from inception to completion on a project-specific basis.

Experience Required/Skills Required:

- B.S. degree in Engineering or related
- Minimum 7 years experience in engineering design for building construction projects.
- PE preferred but not required with the right experience level
- Currently designing building electrical systems
- Some knowledge of Auto CAD; proficient in MS Excel and MS Word
- Must have the ability to interact and perform as part of a team
- Excellent organizational and communication skills are required.
- Must be able to traverse difficult terrain [approximately 25% of job] at construction sites with no assistance.
